INTRODUCTION

These are important times in mental health care delivery. Managed care, privatization, and comprehensive community service systems are among the new and challenging initiatives before us. Equal in value are similar advances in astute clinical care, empirical data-based research, and sound theory building that extends the boundaries of our knowledge about mental illness.

In today's age, no health care provider can be fully knowledgeable in all specialty areas of practice. The purpose of this Speakers Bureau is to begin to address this need by bringing together the state's specialists in mental health care with the Department of Mental Health state and provider employees who provide the daily direct care to the clients entrusted to us. The goal of the Bureau is to enhance our understanding of mental illness and to improve the quality of services that we collectively provide.

Each specialist has volunteered to provide one one-and-one half-hour presentation to any DMH state or provider agency that makes such a request. The specialist consultant could be asked to provide a didactic presentation in his or her speciality area, staff a case consultation in the specialty area, serve as a panelist in a forum to discuss clinical or theoretical issues, and so forth. This service is provided at no cost by the speakers and their participating agencies.

Each agency is permitted one speaker in any given fiscal year. **Please complete the request form at the back of this booklet and mail it to Judy Pina at the address on the form.** No agency is permitted to call speakers directly, no agency may use the Speakers Bureau to staff its weekly or monthly conferences for a year, and no agency may request a speaker for a program that has paid registrations. (This includes fees for CME/CEU credits.) **Any agency that calls a speaker directly will forfeit its speaker for the year.** The Speakers Bureau is not operational during the summer months.

A project of this scope would not be possible without the support of its participating institutions. Marylou Sudders, Commissioner, the Deputy Commissioners, and the Area Directors have provided the full support of the State's Department of Mental Health. The Chairs of the Department of Psychiatry from three of the State's medical schools have been equally supportive. Domenic Ciraulo, M.D., Boston University, Joseph Coyle, M.D., Harvard University, and Paul Appelbaum, M.D., University of Massachusetts, have generously made available their various faculties. Cooperation for a project such as this would be expensive in the best of times; in an era of fiscal restraint, it is truly remarkable.

Our thanks to each person noted above, to each of the managers at the various institutions who administer the Speakers Bureau at the local level, and to all the speakers for their generosity in volunteering to share with others what they have learned about mental illness, mental health, and the provision of such knowledge to those in need.
